

## Speakers for Sale

Custom speakers for sale as featured in audioXpress magazine. These two speakers are three way design each utilizing a 12" Dayton Audio Ultimax woofer in a sealed box configuration, a 7" silver graphite cast frame midrange as used in the Legacy Audio Signature SE speaker and an original Heil AMT tweeter, both on a dipole baffle sitting on top of the bass cabinet. The cabinets were originally from the Acarian Alon speaker and have the original grills.

Currently they are configured for tri-amping but can be wired differently if desired. Other options could be to use two 500W Dayton Audio plate amps for the woofer and passive crossover for the mids and tweeters. If other choices are needed I can build them charging only the parts cost.

The price for the pair of speakers in their current configuration is \$1,500. Copies of the audioXpress article are available. The photo shows an old midrange not the current one.
